

# LASER SENSORS

You can make speed measurements using the reflex method with our powerful laser cable in combination with the laser tachometer. Depending on requirements, a line disc or a dashed tape is scanned.

## TECHNICAL SPECIFICATIONS

Recommended line width	1 mm at 80 mm distance of the laser head
Length of laser cable	5 m
Minimal line width	0,15 mm (under optimal conditions)
Housing	Stainless steel
External thread	M10x1
Accessories	90° mirror
